

Our first Carbon Crown Fairway lowers CG for optimal launch conditions. 30g (two at 15g) of sliding weight allows golfers to personalize trajectory to maximize performance and consistency.

A FAIRWAY FOR ALL SWINGS

- **Carbon Composite Crown** – Shifts weight low for optimal launch and spin conditions
- **Front Track System** – Two sliding weights (15g each) can be moved for preferred shot shapes ranging from Draw – Neutral – Fade
- **Advanced Sole Design** – Recessed weights and design for better turf interaction
