

“ The big idea behind the M2 iron was all about achieving maximum distance without sacrificing peak trajectory. The materials and technologies that went into M2 allowed us to uniquely combine metalwood-like launch conditions with class-leading shot height, an achievement that even exceeded the expectations of those of us who designed and engineered it.

TOMO BYSTEDT
DIRECTOR PRODUCT CREATION – IRONS

REAL INNOVATION. UNREAL DISTANCE.

► Dramatic Distance from Every Iron

- Our large, unsupported, thin face and new Speed Pocket enable ball speeds that push the limits of distance performance in an iron
- By employing three unique weight-saving features—“L-shaped” toe design, 360° undercut, and our new thick-thin fluted hosel—we are able to position the center of gravity ultra-low. This gives us the ability to utilize stronger lofts without sacrificing peak trajectory, resulting in long, playable shots from each iron
- A new V-shaped badge provides great sound, while dampening unwanted vibrations for improved feel

SHAFT

Steel - REAX 88HL - S, R
Graphite - REAX S-75, R-65, M-55, L-45

GRIP

Men's - TM Speed Grey End Cap .600 47g
Women's - TM Winn White End Cap .580 37g
